

FIBERGLASS FILTER MEDIA PADS, ROLLS AND POLYESTER MEDIA ROLLS

FIBERGLASS FILTER MEDIA PADS

- Air entry on colored side
- Pre-cut to size
- Economical to use
- Progressive density for greater dust holding
- Priced each. Sold in full cartons.

Construction: Fiberglass media is designed progressively denser (air entry to air leaving) to ensure maximum dust holding and filter efficiency. UL Classified as to flammability only; Class 2 (R12347).

FIBERGLASS FILTER MEDIA ROLLS

Economical bulk rolls of 1" and 2" thick fiberglass filter material for replacing hammock type filters in furnaces and air conditioners. Easily cut to required size.

Construction: The fiberglass media is designed with a progressively denser configuration to ensure maximum dust holding and filter efficiency. UL Classified as to flammability only; Class 2 (R12347).

POLYESTER FILTER MEDIA ROLLS

Frequently used when fiberglass filters are not acceptable. Synthetic media is soft and easy to handle. Higher dust holding capacity than most fiberglass filters.

Filter material withstands direct moisture and has an operating temperature range of -40° to 180° F. UL Classified as to flammability only; Class 2 (R12347).
